®Glutoclean

WPC and BPC impregnation

Technical Data Sheet

1l / Item number 101101205 / EAN 4250295104303

Provides WPC (Wood-Polymer Composite) surfaces with long-lasting and invisible protection against dirt and signs of wear. The impregnation prevents liquids from penetrating the surface. Suitable for all WPC surfaces, both indoors and outdoors.

- Long-lasting protection against oily, greasy and water-based stains
- protects against re-soiling
- enough for 20–25 m²

Area of application

WPC and BPC protection for patios, balconies and gardens: provides invisible protection for surfaces against dirt, oil, grease and water stains, and makes cleaning easier.

Processing

Use only on dry surfaces. The surface must be cleaned beforehand. Apply the impregnating agent undiluted using a paint roller or brush, in a thin but even layer. Effectiveness can be enhanced by applying a further coat wet-on-wet. Do not apply more of the impregnating agent than the surface can absorb. After application, leave to soak in for 10 minutes and, if necessary, blot up any excess liquid with an absorbent, dry cloth. No streaks should remain. Dried residues can be removed with a cloth that has been soaked in the impregnating agent beforehand. The subsequent drying time for the impregnating agent is one to two hours. The surface must not be walked on or treated with moisture during this drying phase. Full effectiveness is achieved after 24 hours.

Storage

Keep the container tightly closed and store in a cool place, away from frost. Keep out of the reach of children.

Notes

When treating larger areas, always work in small sections. Protect and cover surfaces that are sensitive to solvents, or glass, before application.
