®Glutoclean

Algae and Green Deposits Remover

Technical Data Sheet

1l / Item number 038303074 / EAN 4044899383031

For the automatic and effective removal of algae and green deposits. Helps prevent new growth. Versatile for outdoor use. For patios, driveways, building façades, pavements, roofs, fences and all surfaces made of stone, glass, concrete and ceramic, as well as roof tiles, roofing felt, paving slabs, clinker bricks and paving stones, terracotta and similar materials.

- Concentrate
- works automatically and preventatively
- for stone, brick, plastic and glass
- 1 litre is enough for up to 150 m²

Area of application

For the automatic and effective removal of algae and green deposits. Helps prevent further growth.

Processing

The surface to be treated should be dry. Depending on the extent of the build-up, use the cleaner undiluted or diluted with water in a ratio of up to 1:10. Apply using a watering can, spray bottle or, for larger areas, a pressure sprayer. Leave to work for at least 24 hours and do not rinse off. Green deposits will disappear without any further treatment of the surface; any residue will be washed away by the next rainfall or can be rinsed off with water. Repeat the application if necessary for particularly stubborn growth. Clean tools with water after use.

Storage

Keep the container tightly closed and store in a cool place, away from frost. Keep out of the reach of children.

Notes

During treatment, the green growth may undergo temporary discolouration (brown-red), but this will fade again when exposed to sunlight and the elements.
