Professionally and effortlessly removes limescale build-up and deposits. With regular use, it preserves the quality of flavour, extends the service life of appliances and saves energy. For descaling coffee machines, fully automatic coffee machines, espresso and coffee pod machines, hot water dispensers, steam irons, immersion heaters, washing machines, taps, shower heads and water filters.

- Concentrate
- Prevents limescale build-up – preserves the flavour
- for fully automatic espresso and coffee machines
- for catering and domestic use
- saves energy

Area of application

Effortlessly removes limescale deposits and build-up. When used regularly, it preserves the taste and extends the appliance’s lifespan.

Processing

Coffee machines/hot water dispensers:
Pour 1/4 cup of descaler into the machine along with 2 cups of water. Switch on the machine and run one cup through it. Switch off the machine and leave it to stand for 10 minutes. Switch the machine back on and run the remainder through. Then rinse through 2–3 times with fresh water.

Washing machine:
Use 250 ml (1/4 bottle) per washing machine load of water. Heat to 40 °C and leave to soak for one hour. Then start the main wash cycle and run the machine through the entire cycle, including the rinse cycle.

Taps, shower heads, water filters:
Apply the descaler to the items using a cloth or sponge, leave to work and then rinse with water. Small parts can also be soaked briefly in a solution diluted 1:1 with water. Repeat the process if necessary.

Storage

Store the container tightly sealed in a cool place, but protect from frost.
Keep out of the reach of children.

Notes

Always follow the appliance manufacturer’s descaling instructions. This product contains acid. Take care to avoid splashes on acid-sensitive surfaces such as marble, enamel, chrome, textiles and the like.
