Brick & Facade Cleaner

Technical Data Sheet

1l / Item number 030503074 / EAN 4044899305033

Dissolves and removes stubborn cement residue, efflorescence, hardened construction dirt, mortar residues, limescale deposits and inorganic surface contamination. Suitable for all acid-resistant façade and clinker surfaces such as clay, brick and clinker paving, split-face slabs, ceramic wall and floor tiles, clinker slabs, coarse ceramics, porcelain stoneware and cotto coverings, concrete surfaces, exposed aggregate concrete slabs and lime-free, acid-resistant natural stone.

- Concentrate
- to prevent efflorescence and dry rot
- for surfaces that are not sensitive to acids

Area of application

Brick & Facade Cleaner removes efflorescence, mortar residue, limescale, construction dirt and inorganic dirt.

Processing

Thoroughly pre-wet the surface to be cleaned, paying particular attention to the grout lines. Depending on the severity of the soiling, apply the product undiluted or diluted up to a ratio of 1:10 to the pre-wetted surface and work it in using a scrubbing brush, stiff brush or scrubbing pad. Leave to work for a short time, but do not allow it to dry. Work it in again and scrub off any loosened residue with a scrubbing brush or remove it with a sponge, squeegee or cloth. Rinse thoroughly with plenty of water. In the case of heavy efflorescence, repeat the process after 30 minutes.

Storage

Keep the container tightly closed and store in a cool place, away from frost. Keep out of the reach of children.

Notes

Always check for surface compatibility before use and carry out preliminary tests to assess suitability and consumption. Protect adjacent surfaces and wash off any splashes immediately. Avoid contact with metals, enamel or chrome-plated objects. Calcareous natural stones such as marble and various types of granite are sensitive to acids. Use may cause irreversible damage. Always test beforehand.
