Limescale and Cement Residue Remover ZSK

Technical Data Sheet

5l / Item number 121205074 / EAN 4044899121206

The Limescale and Cement Residue Remover ensures quick and thorough cleaning following construction, renovation and tiling work. It reliably removes cement residue, concrete and mortar residues, limescale deposits and inorganic dirt, restoring acid-resistant surfaces such as tiles, clinker, porcelain stoneware and granite to their original cleanliness.

- highly effective
- works quickly and easily
- to prevent limescale build-up, efflorescence and mortar residue
- for acid-resistant surfaces

Area of application

Limescale and cement residue remover for bathrooms, patios, balconies and façades: quickly and safely dissolves limescale, mortar residue and cement residue from tiles and stone.

Processing

Work it in with a scrubbing brush or sponge and leave it to work for a short while. Work in small sections and ensure it does not dry out. Remove the loosened dirt with a sponge or cloth and rinse thoroughly with plenty of water.

Storage

Store the container tightly sealed in a cool place, but away from frost.
Keep out of the reach of children.

Notes

Always check for surface compatibility before use. Ensure the surface is thoroughly dampened before treatment, particularly in the joint areas. Protect adjacent surfaces and wash off any splashes immediately. Avoid contact with metals, enamel or chrome-plated objects. Calcareous natural stones such as marble, shell limestone, Jura, Solnhofen limestone and travertine are sensitive to acids. Use of this product may cause irreversible damage. Exercise caution with certain types of granite (e.g. Kashmir White, various Padang varieties or Crystal Black). Always carry out a test beforehand.
