®Glutoclean

Mould-resistant paint

Technical Data Sheet

750ml / Item number 012305092 / EAN 4044899123958
2,5l / Item number 012301092 / EAN 4044899123910

A white, high-coverage emulsion paint, specially formulated to provide long-term protection for surfaces prone to mould and mildew indoors. Matt finish. Solvent-free.

Area of application

For application to all mineral substrates such as plaster, concrete, brick, stone, surfaces painted with emulsion paints, plasterboard, as well as wood-fibre wallpaper suitable for painting, etc. indoors.

Processing

Remove mould and fungus from the surface using Glutoclean Mould Remover.
For any filling work that may be required, it is recommended to treat the surface with an exterior-grade filler, e.g. PUFAS AKS Exterior Filler. Surfaces with residual moisture that has led to the formation of mould should be pre-treated with Glutoclean Mould-Blocking Paint.
The substrate must be dry, sound and free from any substances that may cause separation. Glutoclean Anti-Mould Paint can be applied with a roller or brush. For the first primer coat, the paint may be diluted with 10% water. The final coat is applied undiluted. Before applying the second coat, the first must be thoroughly dry (depending on air temperature, humidity and the absorbency of the substrate, drying time is approximately 6–8 hours). Glutoclean anti-mould paint can also be tinted with up to 5% FixColor paint or up to 2% Pufamix tinting concentrate.

Storage

This product is frost-resistant!
If it freezes, allow it to thaw at room temperature; do not force the thawing process! Stir well before use.
Shelf life: at least 36 months from the date of manufacture.
Store in a cool place.

Notes

Rinse tools with water immediately after use.
Do not use at temperatures below +5°C!

Keep out of the reach of children.

Base ingredients: synthetic dispersion, titanium dioxide, calcium carbonate
Density: 1.5 g/cm³
pH: 8–9
Coverage: 150–200 ml/m² for a single coat
