Glutoclean

Marble + Granite Waterproofing

Technical Data Sheet

1l / Item number 035703074 / EAN 4044899357032

Ready-to-use specialist waterproofing treatment for long-lasting protection against oil, grease, limescale and water stains. Reduces the penetration of dirt, moisture, paint, oil and grease, and makes cleaning easier. Liquids can simply be wiped away before stains have a chance to form on the surface. For all indoor and outdoor surfaces made of absorbent natural and artificial stone, such as polished, honed or sandblasted marble, limestone, travertine, Solnhofen tiles, sandstone, quartzite, cast stone, terrazzo, slate, as well as polished, honed, flamed or sandblasted granite, clinker and ceramics, and cotto. For floors, walls, tables, worktops, window sills, bathrooms – particularly tiled showers – or kitchen units.

- long-lasting protection against stains
- limescale- and water-repellent
- also for sealing joints

Area of application

Special impregnating treatment for kitchens, bathrooms, hallways and patios: provides long-lasting protection against oil, grease, limescale and water stains, and makes cleaning easier.

Preparation

The surface must be dry, clean and absorbent before treatment. The more the stone can absorb, the better the result will be

Processing

Apply the product undiluted using a soft brush or plastic roller, applying it generously and evenly – taking into account the absorbency of the surface. Applying a second coat increases the effectiveness, but only apply as much as the surface can absorb. Leave to soak in for approx. 1 hour, then polish off any impregnating agent that has not been absorbed using a dry, absorbent cloth. No streaks should remain. The drying time is 3 to 4 hours; do not walk on the treated area during this time. The waterproofing reaches full effectiveness after 24 hours.

Storage

Keep the container tightly closed and store in a cool place, away from frost. Keep out of the reach of children.

Notes

Natural stones vary greatly depending on their origin and composition and may react differently. You should therefore always test for any colour changes beforehand on an inconspicuous area. On polished marble, wine, orange juice, cola and similar substances may still cause matt patches to appear. However, these are much less pronounced than on unprotected marble and are easier to clean. Shelf life: 5 years from the date of manufacture.
