®Glutoclean

Rust stain remover

Technical Data Sheet

750ml / Item number 038002074 / EAN 4044899380023

For removing rust stains and other metal oxide residues. Acts automatically, penetrates deeply and is non-corrosive. For removing all rust stains caused, for example, by iron-containing fertiliser, garden furniture, metal tools, dripping taps, heating system leaks or metal fences. For all surfaces made of stone, artificial stone and ceramics, both indoors and outdoors. For the house, cellar, garage floor, patio, driveway, pavement, walls and façades.

- automatically and thoroughly removes rust stains and other metal oxide residues
- removes fertiliser stains
- acid-free
- also suitable for acid-sensitive surfaces such as marble and natural stone

Area of application

Rust stain remover effectively removes rust and metal oxide residues from stone, tiles, patios and façades.

Processing

Spray the dry surface of the stain thoroughly and evenly. Wait for the product to take effect – indicated by a purple discolouration and the characteristic odour – and leave it to work for 5–10 minutes. Then work it in using plenty of water and a sponge, brush or scrubber. Rinse off again with water. Repeat the process if necessary. Ensure the area is well ventilated when using the product indoors. Rinse the spray gun thoroughly with water after use.

Storage

Keep the container tightly closed and store in a cool place, away from frost. Keep out of the reach of children.

Notes

Higher temperatures on the surface to be treated accelerate the effect. Therefore, avoid using the product at temperatures below +15 °C where possible. To enhance the effect, pre-heat the surface with a hairdryer or hot-air gun if necessary. Do not allow the violet discolouration typical of the reaction to dry; instead, rinse thoroughly with plenty of water. If any violet residue remains on particularly light-coloured surfaces or in the pores, rinse again with water. Minor residues will disappear when exposed to the elements or UV radiation.
