Glutoclean

RSK Adhesive Tape Residue Remover

Technical Data Sheet

250ml / Item number 037001074 / EAN 4044899370017

A highly effective combination of active ingredients for the gentle loosening and complete removal of self-adhesive and firmly stuck stickers, labels and adhesive residues. Also suitable for removing ink, greasy and oily stains, tar and soot.

- removal without leaving any residue
- extra powerful against adhesive residue
- also resistant to ink, oil, grease and soot

Area of application

Gently dissolves and removes stickers, labels and adhesive residue. Also effective against ink, grease, oil, tar and soot.

Processing

Soak a dry cloth with adhesive tape residue remover and apply it to the adhesive tape residue. Leave it to soak in briefly, then start at one corner and peel off the adhesive tape. Then rub off any remaining remover thoroughly and wipe with plenty of water. For plastic labels, mechanically remove or score the top layer before use so that the remover can penetrate. To treat stains, work with a soaked cloth and always rub to dissolve them. Then soak up any residue with an absorbent cloth.

Storage

Store the container tightly sealed in a cool place, but protect from frost.
Keep out of the reach of children.

Notes

Always test for surface compatibility on an inconspicuous area before use. Not suitable for certain plastics, such as Plexiglas (acrylic glass). When using on painted or delicate surfaces, dilute the product only 1:1 with washing-up liquid.
