®Glutoclean

Cement residue remover

Technical Data Sheet

1l / Item number 037903074 / EAN 4044899379034

For the quick and easy removal of cement residue, concrete and mortar residues, limescale deposits, efflorescence and inorganic dirt. Ideal for post-construction cleaning. For use on all acid-resistant surfaces such as ceramic wall and floor tiles, clinker tiles, coarse-grained ceramics, porcelain stoneware, brick, clay and terracotta paving, slate, quartzite, exposed aggregate concrete slabs and lime-free natural stones such as granite.

- Concentrate
- for acid-resistant surfaces
- highly effective
- is also effective against limescale, efflorescence and mortar residues

Area of application

For the quick and easy removal of cement residue, concrete and mortar residues, limescale deposits, efflorescence and inorganic dirt.

Processing

Always pre-wet the soiled surface. Apply the cleaner undiluted or diluted with water up to a ratio of 1:10, depending on the degree of soiling. Work it in with a scrubbing brush or sponge and leave it to work for a short while. Work in small sections and ensure it does not dry out. Wipe up the loosened dirt residues with a sponge or cloth and rinse thoroughly with plenty of water.

Storage

Keep the container tightly closed and store in a cool place, away from frost. Keep out of the reach of children.

Notes

Always check for surface compatibility before use. Ensure the surface is thoroughly dampened before treatment, particularly in the joint areas. Protect adjacent surfaces and wash off any splashes immediately. Avoid contact with metals, enamel or chrome-plated objects. Calcareous natural stones such as marble, shell limestone, Jura, Solnhofen and travertine are sensitive to acids. Use may cause irreversible damage. Exercise caution
with various types of granite (e.g. Kashmir White, various Padang varieties or Crystal Black). Always test beforehand.
