®Glutoclean

Oil Stain Remover

Technical Data Sheet

500ml / Item number 038102074 / EAN 4044899381020

For loosening and thoroughly removing mineral and synthetic oil stains, as well as oil- and grease-based soiling. Also suitable for older and stubborn residues. Long contact time thanks to its gel-like consistency. For garages, driveways, pavements and other surfaces made of natural stone, engineered stone, cement screed and concrete, as well as for glass, tiles, metal, glazed and unglazed ceramics, clinker bricks and paving. Also suitable for workshops, motor vehicles, tools and machinery.

- removes engine oil, diesel and heating oil stains
- even for deep-set and old oil stains
- for garages, driveways, pavements, etc. (not suitable for tarmac or asphalt surfaces)

Area of application

Oil stain remover gel effectively removes mineral and synthetic oil stains, grease and stubborn residues right down to the core.

Processing

Use only on dry surfaces. Shake the container well before use. Apply the oil stain remover generously to the stain and spread it over the area using a brush or a broom. Depending on the severity of the stain, leave it to work for several hours (preferably overnight). A light-coloured powdery layer will form, which
can then be swept away. For particularly stubborn stains or those deeply embedded in the surface, repeat the process if necessary.

Storage

Keep the container tightly closed and store in a cool place, away from frost. Keep out of the reach of children.

Notes

Do not use on plastic surfaces or tarmac. On very dark surfaces, a small amount of residue may remain after sweeping away the light-coloured powder layer; this will disappear of its own accord after a short time. If desired, this can also be removed immediately using Glutoclean grease, wax and dirt remover.
