

® **Glutoclean**

Mould Remover chlorine-free
Schimmel Entferner chlorfrei

Characteristics :

- With active oxygen
- Odourless
- For absorbent surfaces like wallpapers, plaster and masonry
- Especially for living spaces, sleeping and children's rooms

Action :

Removes easily mould, bacteria and mould stains. Highly effective thanks to active oxygen. Acts without chlorine, disinfects and is odourless.

Scope of application :

For sleeping and children's rooms as well as all kind of living rooms, kitchens, pantries, cupboards and fridges. For removing mould on wallpapers, wood, plaster, masonry, stone, ceramic, plastics, leather and fabrics. Suitable for all acid-proof surfaces.

Application :

Do not brush off or pre-treat the affected areas in any manner to avoid spreading the mould spores. Spray the contaminated spot carefully and area-wide until a film has been formed. Then leave to soak for approx. 30-60 minutes depending on the strength of the infestation, possibly longer or overnight if need be. Soak up the detached residues using a soft brush or sponge, then thoroughly rinse with a damp cloth or sponge.

Indications :

Prior to application, always test for surface compatibility. Not suitable for acid-sensitive surfaces as marble and calcareous natural stones. Do not spray on plants or metal. As the case may be, immediately rinse off with a lot of water.

Storage :

Store well sealed in a cool and dry place. Do not allow the product to enter the drainage system or waters.

Technical data:

Density : 1,05 g/cm³
pH value : 2,5 – 3,5
Appearance : fluid
Odour : characteristic
