

Algae and Moss Remover Algen und Moos Entferner

Description

Concentrate! Self-acting and preventive. Removes green layers. Sufficient for up to 300 m². For stone, wood, plastic and glass.

Action

For self-acting and effective removal of algae, mosses and green crusts. Prevents new attack.

Scope of application

Versatile applications in outdoor areas. For terraces, driveways, house fronts, walkways, roofs, fences and all surfaces made from stone, glass, concrete and ceramic, roof tiles as well as roofing felt, slabs, clinker bricks and paving stones, terracotta and the like.

Application

The surface to be treated should be dry. Apply the remover pure or diluted with water up to 1:20 depending on attack of the surface.

Spread with watering can, spray bottle or pressure sprayer in case of larger areas. Leave to soak for at least 24 hours and do not rinse. Green layers will disappear without any further surface treatment and any residues will be eliminated with the next rain or they can be rinsed off with water. Repeat application in cases of particularly persistent attack if necessary.

Clean working equipment with water after use.

Please note

The green layers might change in colour (brown-red) for a short time during the action of the remover but will, however, disappear again when exposed to sun radiation or weather.

Technical data

- Density: 1.0 g/ml
- pH value: 6.0-7.5
- Appearance: clear liquid
- Odour: neutral

Consumption/range

- Depending on surface absorbency, 1 litre is sufficient for 10-15 m²

Safety notes

- Irritant and dangerous
- Irritating to skin.
- Risk of serious damage to eyes.
- Very toxic to aquatic organisms.
- Keep out of the reach of children.
- Do not inhale the aerosol. Avoid contact with skin and eyes.
