

Tiles and Stone Basic Cleaner - acid Fliesen und Stein Grundreiniger - sauer

Description

Powerful basic cleaner concentrate! For indoor and outdoor areas. Ideal as terrace cleaner. Also for fine stoneware, split and ceramic tiles.

Action

Concentrate for powerful and material-protecting removal of stubborn dirt, lime crusts, urine scale, boiler scale, slight cement film and rust from acid-proof surfaces.

Scope of application

For all acid-proof surfaces in indoor and outdoor areas. For tiles, split tiles, ceramic floor tiles, fine stoneware and natural stones insensitive to acids (such as various granites, slate, quartzite, basalt) chrome, stainless steel and glass. Can be used in all sanitary and wet areas, toilet, swimming pool, terrace and balcony.

Application

Apply the cleaner onto the pre-wetted surface undiluted or diluted up to 1:10 depending on degree of contamination. Distribute with a scrubbing brush or sponge and leave to soak a short while avoiding surface drying in the process. Rub off the dissolved residual dirt using a scrubbing brush and remove with sponge, vacuum cleaner or wiping cloth. Rinse thoroughly with plenty of water.

Please note

Always check surface compatibility before application. Prior to treatment, pre-wet the surface particularly in joint areas. Protect adjoining surfaces and immediately wash off splatters.

Chalky natural stones such as marble, shell limestone, Jura marble, slabs from Solnhofen and travertine are sensitive to acids. The application may cause irreversible damage.

Caution with various granites (e.g. Kashmir White, various sorts of Padang or Crystal Black). Be sure to test them first.

Technical data

- Density: 1.09 g/ml
- pH value: 0.5-1
- Appearance: clear liquid
- Odour: lemony fresh

Safety notes

- Irritant
- Irritating to eyes, respiratory system and skin.
- Keep out of the reach of children.
- Do not inhale the aerosol.
