

Porcelain Stoneware Impregnation Feinsteinzeug Imprægnerung

Description

Protects against oily, greasy and water-based contamination. For polished, matte, ground and structured fine stoneware in indoor and outdoor areas. Can also be used as joint protection.

Action

Impregnates surfaces permanently and protects invisibly against contamination and traces of usage. The treated surface is easy to clean and protected against future contamination, e.g. through oil, grease and water stains.

Scope of application

For all surfaces of polished, matte, ground and structured fine stoneware or stoneware in indoor and outdoor areas.

For treatment of tables, walls, floors or worktops. Can also be used for porous surfaces such as concrete joints.

Application

Apply on dry surface only. The surface must be cleaned before hand.

Apply the undiluted impregnation thinly but covering using a paint roller or brush.

The efficiency can be enhanced by a further wet-on-wet application. In the process, do not apply more impregnation than can be absorbed by the surface.

Leave it to soak 50 minutes after application. Remove excess liquid using an absorbent dry cloth. No streaks should remain. Dried residues can be removed with a cloth which has previously been soaked with impregnation. The subsequent impregnation drying time is 3-4 hours. The surface should not be accessed and there should not be any damp treatment during this drying time.

Full effect is given after 24 hours.

Note:

Always work in sections on large areas. Cover glass and surfaces sensitive to solvents during the application. When used as joint protection, apply only onto clean, stain-free and through-hardened joints. Otherwise this may result in unevenness and discoloration.

Technical data

- Density: 0.78-0.80 g/ml
- pH value: n.a.
- Appearance: light yellow liquid
- Odour: mild

Consumption/range

- Sufficient for 40-60 m²

Safety notes

- Harmful
- Harmful: may cause lung damage if swallowed.
- Repeated exposure may cause skin dryness or cracking.
- Keep out of the reach of children.
- Do not inhale vapour.
- Avoid contact with skin.
- If swallowed, do not induce vomiting.
- Seek medical advice immediately and show this container or label.
