

Rust Stain Remover

Rostflecken Entferner

Description

Removes rust stains also from surfaces sensitive to acids such as marble and natural stone. (Against fertiliser stains. Acid-free. Self-acting).

Action

For removal of rust stains and other metal oxide residues from all natural and artificial stones, tiles and ceramic surfaces. Self-acting, automatic and non-corrosive. For the removal of all rust stains which were produced by, for example, iron-containing fertiliser, garden furniture, metal tools, dripping taps, heating system leakages or metal fences.

Scope of application

For all surfaces of stone, cast stone and ceramic in indoor and outdoor areas. For house, cellar, garage floor, terrace, driveway, walkway, wall and façade.

Can also be applied on all stone surfaces sensitive to acids such as marble, granite, cast stone, limestone and sandstone, terrazzo, slate or the like.

Application

The area to be treated must be dry. Spray the stains richly and evenly. Wait for the occurring effect in form of violet discolouration as well as typical smell and leave to soak for 5-10 minutes.

Afterwards, rework using plenty of water and sponge, brush or scrubbing brush. Then re-rinse with water. Repeat the process for old or stubborn rust stains if necessary.

Provide good ventilation when used in closed rooms. Rinse the spray gun well with plenty of water after use.

Please note

Higher temperatures on the surface to be treated promote and improve the action. It is not advisable to use the remover at temperatures below 15 °C. If necessary, preheat the surface using a fan or a heat gun. Do not allow the reaction-typical violet discolouration to dry but rinse with plenty of water. In case there should still be any violet residues on bright surfaces or in pores, re-rinse with water.

Minor residues will disappear under atmospheric influences or UV radiation.

Technical data

- Density: 1.02 g/ml
- pH value: 7.0
- Appearance: clear liquid
- Odour: very characteristic

Safety notes

- Harmful
- Harmful by inhalation and if swallowed.
- May cause sensitisation by inhalation and skin contact.
- Keep out of the reach of children.
- In case of contact with eyes, rinse immediately with plenty of water and seek medical advice.
- After contact with skin, wash immediately with plenty of water.
- Wear suitable protective gloves.
- If swallowed, seek medical advice immediately and show this container or label.
- Use only in well-ventilated areas.
